- 43** Reader's Gallery
Super shots of Jupiter, Moon Halo and nightscapes sent by readers. Compiled by **Ann Dunne**

Sky Diary

- 22** We'll catch the end of the Eclipse of the Moon July 27. Mars is super-bright being at its closest since 2003 and won't repeat this until 2035. Jupiter & Venus blaze in evening skies and line up with the Moon spectacular, and Venus even passes close to Regulus. Saturn is just past opposition (June 27) and so at its best also..
Compiled by **David Moore**.
